Hair How-To's

Lauren Clark of Inesentral Beloved (1457 Church St. NW; 202-299-0750) shares her dress talents with these two looks you can re-create at home.

1. Spray hair with a texturizing product such as Dribles Dry Texturizing Spray (\$39 for 8.5 ounces). Add a headband if desired.

2. Gather two front side sections and secure them with bobby pins in the back.

3. Gather the remaining hair at the nape of the neck and twist it to create one big ringlet.

4. Beginning at the end, roll hair into itself until you have a large loop at the base of the neck.

5. Evenly dispense the loop, pinning as you work.

6. Spray with hairspray and loosen the strands around your face to give it a little texture.

1. Comb hair to remove knots and tangles. Spray with texturizing spray.
2. Beginning at the roots, tease hair in front as if you were doing a bouffant.

3. Gather two front side sections and cross them in an "X" at the back.
4. Hold the "X" in place with your right thumb and grab a section of hair from the front left using your left hand.

5. Cross it over the "X" to meet the hair in your right hand.
6. Repeat the process on the right hand side and alternate until you have a complete fishtail braid. Secure with a bobby pin.

7. Beginning at the end, roll the braid under until it meets the nape of the neck. Secure with pins.
8. Spray with hairspray and loosen the strands that frame your face to give it a little texture.
